PROFESSIONAL SUMMARY

Computer Science & Engineering (AI) student with hands-on experience in Python, Java, Django, Machine Learning, and Deep Learning. Built an interpretable AI-based ECG Noise Classification system using CNN/LSTM and Explainable AI techniques, a Django-based web application, and a Java desktop application with a JavaFX interface and MySQL database integration. Completed two AI and Data Science internships, with strong foundations in Data Structures, OOP, DBMS, and Web Development. Seeking Software Development or AI-focused roles.

SKILLS

Programming Languages: Java, Python, C

Web Technologies: HTML, CSS, JavaScript

Frameworks & Libraries: Django, JavaFX

Database: MySQL, SQLite

Query Language: SQL

Core Concepts: Data Structures, OOP, DBMS

Tools: Git, GitHub, Figma, Canva

Soft Skills: Problem Solving, Communication, Teamwork, Adaptability

PROJECTS

Interpretable AI for Healthcare: Deep Learning-Based ECG Noise Classification

- Developed a deep learning system using CNN/LSTM to classify noise in long-term ECG signals
- Implemented ECG preprocessing, segmentation, multi-class noise detection, and Explainable AI (Grad-CAM/Saliency Maps) for interpretable predictions
- Evaluated performance using Accuracy, Precision, Recall, and F1-Score, enabling reliable cardiac signal quality assessment for healthcare monitoring
- Built a real-time ECG signal processing pipeline including filtering, normalization, feature extraction, and automated noise classification
- **Technologies:** Python, TensorFlow/Keras, NumPy, SciPy, SQLite, CNN, LSTM, Explainable AI (XAI)

Online Quiz System

- Developed a web-based quiz platform with secure user authentication and session handling
- Implemented automated quiz evaluation and scoring for instant feedback
- Built an admin dashboard to manage users, quizzes, and questions efficiently
- **Technologies:** Python, Django, SQLite, HTML, CSS

Smart Expense Tracker

- Developed a Java desktop application with a JavaFX graphical interface to record, categorize, and track daily expenses through an interactive, user-friendly UI
- Designed a modular, layered architecture (domain, repository, and business-logic layers) with MySQL database integration via JDBC for persistent, multi-session data storage
- Built category-wise and monthly spending visualizations (pie chart and bar chart) and a filterable expense table for real-time financial insights
- Implemented input validation and custom exception handling to ensure data integrity across add, update, and delete operations
- **Technologies:** Java, JavaFX, MySQL, JDBC, OOP, Exception Handling

INTERNSHIPS

RESHAPP Software Solutions Pvt Ltd

Dec 2025 – Mar 2026

AI Intern

- Applied machine learning and deep learning techniques (Scikit-learn, TensorFlow, Keras) to develop AI models for classification, regression, and prediction tasks
- Implemented real-world AI applications including natural language processing, computer vision, and automation projects using Python libraries (NumPy, Pandas)
- Followed structured workflows for data preprocessing, feature engineering, model validation, and deployment, ensuring ethical AI practices and documentation

Skilldzire

May 2025 – Jul 2025

Data Science Intern

- Applied Python libraries (NumPy, Pandas, Matplotlib, Seaborn) for data manipulation, visualization, and exploratory data analysis on real-world datasets
- Implemented machine learning algorithms (Linear Regression, Decision Tree, Random Forest, SVM) using Scikit-learn for classification and prediction tasks
- Completed three end-to-end projects: Car Price Prediction, Fashion MNIST Classification, and Hotel Booking Classification
- Strengthened data handling, model training/testing workflows, and communication skills through collaborative project reviews and presentations

EDUCATION

SVR Engineering College

2026

B.Tech in Computer Science & Engineering (AI) — 82%

A.P Model School & College

2022

Intermediate — 90%

A.P Model School

2020

SSC — 98%

CERTIFICATIONS

- Generative AI — NASSCOM
- AI & Machine Learning — Eduskills
- Google Gen AI Study Jams 2024
- Automation Explorer — UiPath
- Data Science Internship Program — Skilldzire
- Quantum Fundamentals — Amaravati Quantum Valley, Qubitech & WISER (Feb 2026)

LANGUAGES

English, Hindi, Telugu
