SUMMARY

Computer Science & Engineering (AI) graduate (2026) with hands-on experience in Python, Java, SQL, machine learning and data analysis from two internships and personal projects. Comfortable cleaning data, building prediction models with Scikit-learn and TensorFlow, and building working applications with Django and Java. Looking for AI/ML or Data Science roles where I can learn and grow.

SKILLS

Programming: Python, Java, SQL, C
Machine Learning: Scikit-learn (Linear Regression, Decision Tree, Random Forest, SVM), TensorFlow / Keras
Data Analysis & Visualization: Pandas, NumPy, data cleaning, EDA, Matplotlib, Seaborn
Frameworks & Databases: Django, JavaFX, JDBC, MySQL, SQLite
Tools: Jupyter Notebook, Google Colab, Git, GitHub
Core Concepts: Data Structures, OOP, DBMS, SDLC

INTERNSHIPS

Data Science Intern | *Skilldzire* May 2025 – Jul 2025

- Cleaned real-world datasets with Pandas and NumPy: handled missing values, removed duplicates and prepared columns for modeling.
- Made charts with Matplotlib and Seaborn, and built and compared ML models (Linear Regression, Decision Tree, Random Forest, SVM) with Scikit-learn.

AI Intern | *RESHAPP Software Solutions Pvt Ltd* Dec 2025 – Mar 2026

- Built classification and regression models using Scikit-learn, TensorFlow and Keras.
- Followed the full machine learning workflow: data preparation, feature engineering, model training and testing.

PROJECTS

Online Quiz System | *Python*, *Django*, *SQLite*, *HTML*, *CSS* Aug 2026 – Oct 2026

- Built a quiz website where users sign up, log in and take timed quizzes; answers are checked automatically and the score is shown instantly.
- Added an admin dashboard to create and manage quizzes, questions and users.
- Deployed live at jeenath3147.pythonanywhere.com | Code: github.com/Jeenath3147/Online-quiz-system

Smart Expense Tracker | *Java*, *JavaFX*, *MySQL*, *JDBC* Aug 2026 – Sep 2026

- Built a Java desktop app to add, edit, delete and categorise daily expenses, with data saved in a MySQL database using JDBC.
- Made JavaFX screens with pie and bar charts for category-wise and monthly spending, plus a searchable expense table.
- Used OOP with a layered design, input checks and error handling. | Code: github.com/Jeenath3147/smart-expense-tracker

Fashion MNIST Image Classification | *Python*, *TensorFlow / Keras*, *NumPy*, *Matplotlib*

- Trained a neural network to recognise 10 types of clothing (T-shirt, sneaker, bag, etc.) from 28×28 grayscale images.
- Scaled the image pixel values, trained the model on 60,000 images and measured its accuracy on 10,000 test images.

Car Price Prediction | *Python*, *Pandas*, *Seaborn*, *Scikit-learn*

- Predicted car selling prices from car details: cleaned the data, converted text columns to numbers, trained Linear Regression and Random Forest, and kept the better model.

Hotel Booking Classification | *Python*, *Pandas*, *Seaborn*, *Scikit-learn*

- Predicted whether a hotel booking would be cancelled; explored the data with charts and checked models with accuracy and a confusion matrix.

ECG Noise Classification | *Final-year team project*, *Team Leader*

- Led a team working on a deep learning model that classifies ECG (heart signal) images as noisy or clean (about 90% accuracy).

EDUCATION

B.Tech, Computer Science & Engineering (AI) | *SVR Engineering College — 79%* 2026

Intermediate | *A.P Model School & College — 90%* 2022

SSC | *A.P Model School — 98%* 2020

CERTIFICATIONS & LANGUAGES

Certifications: Generative AI (NASSCOM), AI & Machine Learning (Eduskills), Google Gen AI Study Jams 2024, Introduction to Agents (Mercor Academy), Python Programming Internship (CodSoft)
Languages: English, Hindi, Telugu
